Quantifying critical N dilution curves across G \times E \times M effects for potato using a partially-pooled Bayesian hierarchical method
European Journal of Agronomy

Dear Dr. Bohman,

I am pleased to be able to inform you that the manuscript EURAGR11860R2: Quantifying critical N dilution curves across G \times E \times M effects for potato using a partially-pooled Bayesian hierarchical method has now been accepted for publication in the European Journal of Agronomy.

The source files will be prepared for press. Proofs will be sent to you in due course.

Your accepted manuscript will now be transferred to our production department and work will begin on creation of the proof. If we need any additional information to create the proof, we will let you know. If not, you will be contacted again in the next few days with a request to approve the proof and to complete a number of online forms that are required for publication.

We encourage authors of original research papers to share the research objects – including raw data, methods, protocols, software, hardware and other outputs – associated with their paper. More information on how our open access Research Elements journals can help you do this is available at https://www.elsevier.com/authors/tools-and-resources/research-elements-journals?dgcid=ec_em_research_elements_email.

With kind regards,

Pirjo Peltonen-Sainio, Ph.D.
Editor In Chief
European Journal of Agronomy
