Hi Brian:

I think you did a great job in addressing reviewer questions. There are a couple of typos in the rebuttal document:

Page 4 middle of page -

Change made here as suggested to **simplify** this statement.

Page 6 middle of page:

....discussed in Section 4.3. of the original manuscript. **Additional** description of the methods has been added to this section.

In the manuscript - reword line 95: Acceleration of N dilution beyond the vegetative...

line 907 - Finally, having sufficient quantity and quality of experimental data remains an essential criteria to.... delete "an" or change to criterion (or reason).

Hopefully the reviewers will agree with your changes and the manuscript will be accepted for publication.

Carl
